EDUCATION

Diploma Information Technology
Taylor's University — 2019-2021

Acquired a good understanding of computer concepts such as system analysis, software engineering and networks. This program developed my problem-solving skills and provided technical knowledge to become a valuable member for organizations that are operated through Information Technology.

Bachelor of Science (Honours) in Information Technology
Asia Pacific University — 2022-2024

Emphasizes both the technical aspects of information technology as well as the organizational concepts of managing an organization while using technology to support its goals. This degree focuses on leadership, managing of projects, and developing strategic information technology solutions for multinational organizational problems.
